

# Vim Canvas<sup>™</sup> Marketplace

# The First App Marketplace For Healthcare Providers

With Vim Canvas<sup>™</sup>, healthcare developers can deploy their custom applications within Vim's EHR-integration engine—creating a growing marketplace of apps that providers can access and use directly in their EHR. The Vim Canvas<sup>™</sup> Marketplace opens the door to more use cases, more innovation, and fewer workflow disruptions.

# Why should providers use Vim Canvas™?

### One Interface. Many Solutions.

Access a growing marketplace of in-EHR applications designed to simplify your workflow—all from a single, easy-to-use interface within the EHR. No toggling between systems or learning new tools.

#### Trusted Technology. Seamless Experience.

Vim's underlying integration layer connects directly to your EHR, meaning apps run smoothly and securely without the need for extra software or complex installations.

### Designed For Your Workflow.

Apps built on Vim Canvas<sup>™</sup> are designed to meet you where you work. Whether it's reducing clicks, improving documentation, or simplifying care coordination, these tools are built with your day-to-day in mind.

#### A Growing Ecosystem of Tools.

As more developers build on Vim Canvas<sup>™</sup>, the number of available apps and use cases continues to expand—giving you access to tools that address your specific clinical and operational challenges.

### All it takes is Vim Canvas<sup>™</sup> to transform your provider operations.
